F

KUBOTA F Series

F-251E - F-251 - F391

#Introduction

Unleash the
Power of Precision
with the
F Series range

F-251 with collector

F-391 with cab

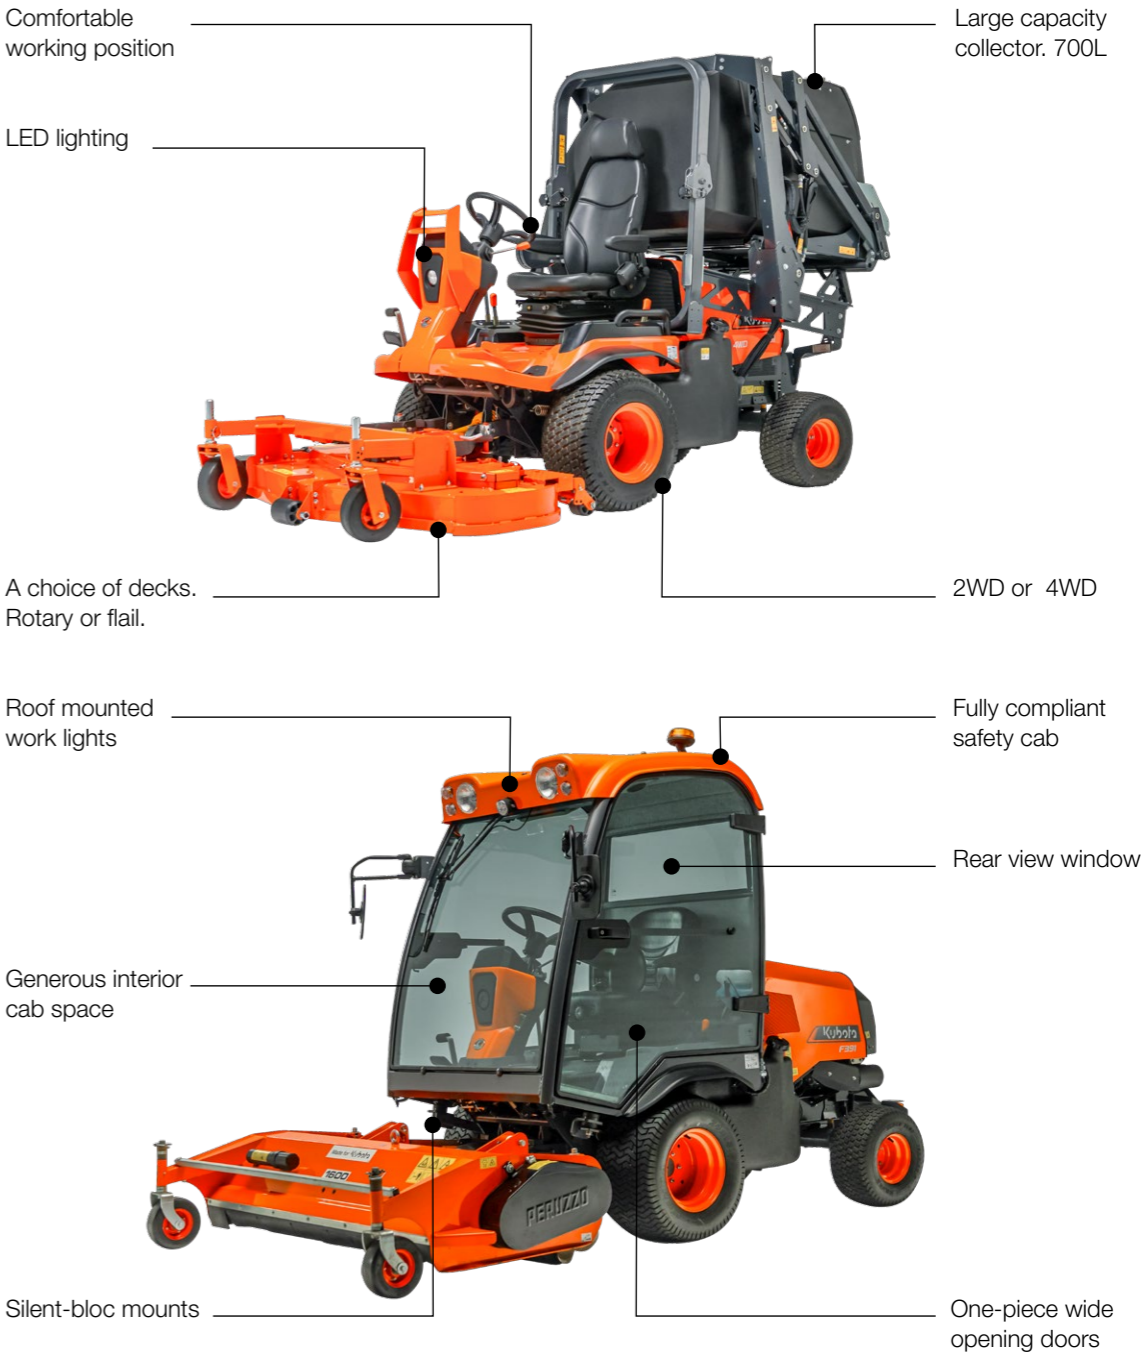

F-391 with collector

Designed primarily for industry sectors such as municipality, sports and golf course facilities, or professional landscapers who demand nothing less than perfection, the F Series range of mowers provides an unbeatable combination of power, versatility, and manoeuvrability. Whether you're tackling expansive lawns, sports fields, parks or commercial properties, these mowers deliver exceptional results every time.

With a choice of mower decks the versatility of the F Series makes it a truly multi-purpose machine.

#Highlights

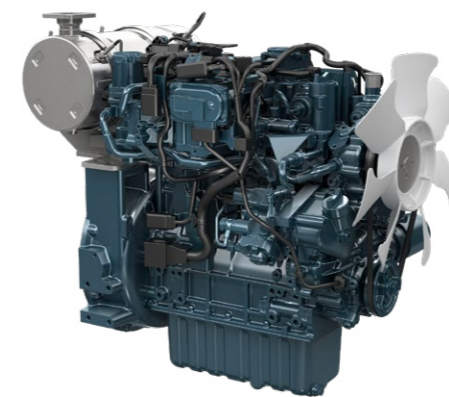

ROPS or cab protection.
However hard your machine works,
operate in comfort and safety

Model	F-251E	F-251	F-391
Power (hp)	24,5	24,5	37,4
Transmission	2WD	4WD	4WD
Grasscollector opt.	N/A	Available	Available
Structure	ROPS	ROPS	ROPS / Cab

#Efficiency & Performance, Manoeuvrability & Comfort

Welcome to the F Series

Efficient Fuel Economy

Powered by KUBOTA D1105 or V1505 engines ensure that you get more out of every tank, reducing fuel consumption and downtime. Reliability and durability are synonymous with Kubota engines.

Enhanced Visibility and Manoeuvrability

With the deck positioned at the front of the mower, operators can see exactly where they are cutting, making it much easier to navigate around obstacles like trees, flowerbeds, or fences.

More Precision: The design allows for a more precise cut, especially around the edges, which means operators don't have to go back and trim those areas later.

Superior Cutting Performance

Backed up by the KUBOTA engine and advanced cutting technology, our mower decks ensure a clean, even cut every time. Whether it's thick grass, uneven terrain, or wet conditions, it handles all with ease.

Ergonomic Controls & Comfort

Designed with comfort in mind, the F Series features suspension seating, intuitive controls, and a smooth ride. Spend more time mowing and less time adjusting your equipment. The ergonomic design ensures you stay comfortable during even the longest mowing sessions.

#Efficiency

Exceptional cutting performance and collection

Uniform cut every time.
The mounting and positioning of the mower deck means it's designed to follow the contour of the ground, and the grass is not flattened prior to cutting. A fully independent PTO drive system ensures minimal power loss and a consistent operating speed whatever the conditions.

Side or rear discharge.
The decks available have cutting widths of 60" or 72" and come with either side or rear discharge. The triple blade design ensures a precise fine cut finish. All decks offer the option of a mulching kit.

Flail mower option.
Two mowers with cutting widths of 1400mm (56") or 1600mm (64") come with front castor wheels on bearing rotation and side skid protection from uneven ground and stones. Excellent performance when tackling all conditions and a choice of blades available to suit the operation.

Complete control
The deck lift arms are controlled from a hydraulic lever to the right-hand side of the operator. When lowering, the deck returns to the required cutting height every time. A speed of drop control provides the operator with full control when lowering the mower. For complete peace of mind, the mower can be locked in position during transportation between sites.

#Comfort

Operate in complete comfort

Comfort and simplicity can be combined
A high-back suspension seat with incorporated headrest and armrests sets the tone for enhanced comfort. A generous floor area with non-slip mats and single pedal HST control adds to the ease of operation. All the major operating controls are located on the RH side.

Comprehensive instrumentation
The instrument panel keeps the operator fully informed of the speed settings and operational functions. The tilting steering wheel allows for a comfortable driving position, whilst ensuring the panel is not visually obstructed.

Auto-Assist 4WD
All-Purpose Use: Whatever the task or terrain, F Series can handle a wide range of challenges. The clever auto-assist 4WD system ensures traction drive under all conditions. The assist operation will automatically engage 4WD when required and switch to 2WD when working in tight turns to facilitate maneuvering. The versatility makes these machines appealing across different sectors.

All weather protection

Operators enjoy an unobstructed view no matter what operation is being performed. Generous headroom and logical control layout gives the operator a big-cab feel. A ventilation system which offers air-conditioning, heater and three-speed fan helps reduce operator fatigue, leading to increased overall productivity.

Comfort of the highest order
The fully integrated cab offers a wide range of innovative features which creates a premium workspace. The generous interior is enhanced by full-glass door panels for complete all-round visibility and the noise level remains at a minimum thanks to thick padded floor matting and silent-bloc mounts. Upholstered interior panels and headliner adds to the quality feel of these machines.

Having to work late. No problem.
Roof mounted road lights and work light allow work to continue into the evening. Rear view mirrors, flashing beacon and fully compliant road lighting package ensures safe transport from the site. The front window is kept clear by a wide-arc parallel screen wiper with washer.

#Grass Collector

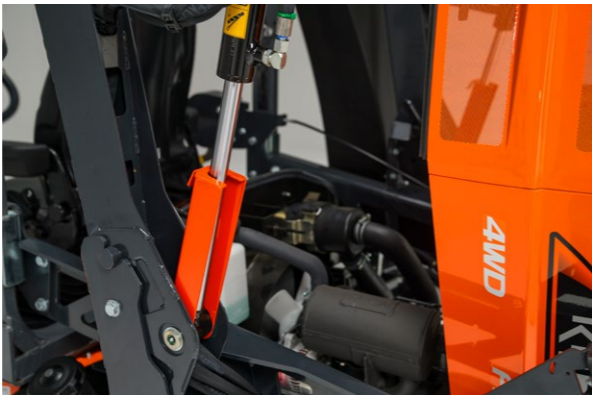

Collect with confidence and ease

Large capacity collector
A 700-litre capacity grass collector allows large areas to be worked before emptying. Lever operated, the high tip collector tank can be unloaded quickly and efficiently.

Chopped material transfer
The powerful suction fan collects and dispatches chopped material quickly and effectively whatever the conditions. The clever design of the collector utilising a deflector inside, ensures the collector is filled completely every time to maximise the operation.

Safety comes first
Safety brackets are permanently fixed to the machine. When the collector is fully raised, simply unlatch the brackets on both sides before carrying out any work in the engine compartment.

#Serviceability

Access for serviceability - Unbeatable

One-piece engine bonnet.
No restriction to the engine compartment, even when fitted with a collector or cab. All checks and maintenance can be carried out easily and safely.

90° mower deck tilt.
The mower deck can be tilted for any maintenance requirements. Quick, effortless positioning allows complete access to the underside.

Genuine parts, genuine confidence
When buying genuine Kubota parts, you can be assured of the highest standards of quality and engineering excellence to deliver unrivalled reliability, efficiency and productivity, supported by a full 18-month warranty *when fitted by a Kubota dealer - for complete peace of mind.

18 MONTHS* WARRANTY
ON ALL GENUINE PARTS

- Kubota Care:**
- Protects you against, Inflation, VAT, Parts, Labour Prices;
 - Provides you with a fully extended warranty of up to 5 years;
 - In the case of a claim your dealer is your point of contact. That means no hassle with third-party providers;
 - Increase your machine's resale value. Kubota Care is transferable to the new owner.

The uniqueness of the out-front mower

Mowing accessibility leads to economical benefits

The front mounted mower deck provides a list of benefits for you.

As well as having the best forward visibility when working, the economic benefit can be enormous as they get into areas that conventional mowers can not reach and can save up to 20% on follow-up work.

The ultimate result is less time spent on each job and maximising the productivity of your machine.

Long-Term Value

- **Cost-Effective in the Long Run:** Though they may have a higher upfront cost than traditional mowers, the durability, performance, and time-saving features of F Series mowers make them a great long-term investment for those who want to get the most value out of their equipment.

Buy with confidence

Kubota is a key player with a long and successful history within the ground care industry.

When you buy a Kubota, you get;

- A strong and established Kubota dealer network.
- The assurance of a reliable and quality product.
- A product that is going to retain good second-hand value.
- A true manufacturers warranty guarantee (Not third party).
